Miscarriage Management at VIWC

We are able to accommodate those patients who have a confirmed miscarriage or fetal demise.

The options we can provide are expectant, medical and surgical management. Our nurse educator and physician will discuss the options with the patient. Surgical management is **Wednesdays at VGH.**

Thanks so much for your work-up and referrals. Please continue to do the Rh and Beta-hCG blood work at VGH as needed, and send us ultrasound results.

STEPS TO SUCCESS:

1. Please call our private line **250 480 7377** BEFORE you tell your patients what might happen. Our MOAs are very skilled at booking, and there is always one of our 4 physicians here if needed.
2. We will let you know right away when we can accommodate the patient
3. Send us the attached Referral Form
4. If your patient is not stable, or actively bleeding heavily, refer to ER at VGH to be seen by gyne-on-call

Kind regards,

Vancouver Island Women's Clinic
